

# World Ear Project: San Bruno Mountain, 1971

## Identifier

WEP.1971.05.18.01

## Description

An ambient field recording made on the top of San Bruno Mountain on May 18, 1971 by Tom Rose. The idyllic scene is easily imagined as the sounds of birds, wind, and the occasional footstep and passing car clearly brings to mind a wind swept panorama of green grass and trees that can only be found in Northern California.
